FDC GLOBAL

OUR MISSION STATEMENT

Fx & Digital Currency Global (FDC Global) is a Tanzanian Group currently working and operating as an Academy basing on Forex and Cryptocurrencies, we are providing knowledge on how to benefit from the fast-growing Financial market and the new rising Digital currencies (Cryptocurrencies). We believe the internet can now provide much more opportunities to people than any other time in the human history or since its beginning in the early 1990s.

Fx and Digital Currency Global is a newly established training academy primarily based on Online consultation service. We are providing consultation service on technology and Online businesses, we are practically involving in the global financial market, investing and trading of the new rising Cryptocurrencies.

FDC Global is a product of a high demand of knowledge of the financial market and Cryptocurrencies, which in reality is one among a few rising training groups in Tanzania. We as a group of youths, we came up with an idea of establishing a training company that will suit the Tanzanians and all other people we could reach by impacting their lives through trainings in an easy language at their comforts. We are aware of the existing training groups or academies in Tanzania, we are also aware of their services they provide and from that point of view we came up with an exceptional service or trainings which will make everyone capable of trading and investing in the fast-growing Online opportunities.

We believe knowledge is the beginning of wealth, that's why at FDC Global we take trainings seriously and in a smart way, we know people are so much excited with the financial market and cryptocurrencies, we know people need to make money now, this moment! but we strongly recommend you take time to know what exactly you are about to get involved with.

Making money in trading can be very easy at the beginning, with a help and guidance of mentors, but losing all of it later on can be

easier than you can ever imagine, we believe it's a hundred times better to get full understanding of the business so you can always stand on your own than depending on people, who are actually humans too. People die, companies collapse, terms change, fees get too high and time cannot allow you to always follow these people (Mentors) behind.

Our priority is to provide trainings so you can be able to tackle the market on your own, we provide analytical skills, both fundamental and technical, we share with you all we know about the financial market from the beginning, we stay with you long enough until you fully understand what you are about to get involved with. We are fully aware of the hot opportunity in cryptocurrencies, we will share with you knowledge of the Bitcoin and the Altcoins, how to trade and invest, how and when to buy the ICOs, and which ones you should avoid.

FDC Global we are working by conducting well arranged training events in every five days of the week from January to December. We are also receiving bookings for private trainings at your comfort so you get trained no matter your inconveniences to attend group trainings. Our trainings are affordable to everyone who needs to understand and take financial market and cryptocurrencies as seriously as any other business.

Feel free to contact us now, wherever you are in Tanzania and all over East Africa. It is our pleasure serving you with knowledge and impacting your life through trainings and mentorship

Thanks,

Sincerely Yours,

Mr. Chaula, E. Frank

Managing Director, Trainer,
Active Trader and Investor

FDC GLOBAL
